- The Defender 110 will be priced from \$49,900⁽¹⁾ in the U.S. and will go on sale in Spring 2020; the Defender 90 body style will be available later in the year 2020. Configure your new Defender at www.landroverusa.com/Defender

(MAHWAH, NJ) – November 12, 2019– Land Rover announced today that the New Defender 110 will make its motion picture debut in the 25th official James Bond film, *No Time To Die*, with a teaser video released to announce its continued partnership with EON Productions.

No Time To Die is the first movie to feature the New Defender, the latest legendary vehicle to star in a James Bond car chase sequence. The New Defender has been tested by the 007 expert stunt team in the most extreme off-road conditions, demonstrating its unstoppable nature.

Footage captured during filming of the upcoming movie gives a unique, behind-the-scenes view of stunt coordinator Lee Morrison and stunt driver Jessica Hawkins at work.

Lee Morrison, James Bond Stunt Coordinator, said, "Designing and coordinating the action sequences for the Bond franchise requires a non-compromising mindset. We needed an unstoppable vehicle to help us battle against the elements, steep descents and river crossings so we chose the new Defender. I'm beyond impressed that the Defender is not only back but much, much better!"

The New Defender provides ground clearance of 11.5-in and world-class off-road geometry, giving the Defender 110 approach, breakover and departure angles of 38, 28 and 40 degrees (Off Road height) respectively. Its maximum wading depth² of 35.4-in is supported by a new Wade program in the Terrain Response 2 system³, so drivers can ford deep water with confidence.

Land Rover's design team worked closely with Special Effects and Action Vehicles Supervisor Chris Corbould on the specification of the Defender vehicles in the film. Based on the Defender X model in Santorini Black, with darkened skid pans, 20in dark finish wheels and professional off-road tires, they were the first Defender vehicles to be built at Jaguar Land Rover's new production facility in Nitra, Slovakia.

Richard Agnew, Global Communications Director for Land Rover, said, "*No Time To Die* is a brilliant way to showcase the capabilities of the New Defender in the latest jaw-dropping James Bond car chase. It's been hugely exciting to continue our relationship with EON Productions and work with their teams to deliver a spectacular sequence."

Britain's biggest vehicle manufacturer has a long-standing partnership with EON Productions on the Bond films, which began in 1983 when a Range Rover Convertible appeared in *Octopussy*.

Alongside the Defender, *No Time To Die* also features the Range Rover Sport SVR, Series III Land Rover and Range Rover Classic.

No Time To Die, is directed by Cary Joji Fukunaga and stars Daniel Craig, who returns for his fifth film as Ian Fleming's James Bond 007. The film will be released globally in cinemas from April 2, 2020 in the U.K. through Universal Pictures International and in the U.S on April 10, from Metro Goldwyn Mayer Studios via their United Artists Releasing banner.

The Land Rover Defender 110 featured in *No Time To Die* will be on display for the first time globally at an out of show event in Los Angeles on November 19th celebrating the North American debut of the new Defender. Consumers can see the vehicle at the 2019 Los Angeles International Auto Show November 20 – December 1, 2019.

The Defender 110 will be priced from \$49,900⁽¹⁾ in the U.S. and will go on sale in Spring 2020; the Defender 90 body style will be available later in the year 2020. Configure your new Defender at www.landroverusa.com/Defender

- 1 All prices shown are Manufacturer's Suggested Retail Price. Excludes \$1,025 destination and delivery, tax, title, license, and retailer fees, all due at signing, and optional equipment. Retailer price, terms and vehicle availability may vary. See your local authorized Land Rover Retailer for details.
- 2 Driving in floodwaters or moving water should be avoided. Driving through water can be extremely dangerous. The Wade Sensing feature only detects depth of water the vehicle is in at the present time and not of water ahead or around the vehicle. Therefore, Wade Sensing cannot predict whether it is safe to proceed and cannot detect steep drops in grade around the vehicle. The driver is responsible for determining the conditions of the route being driven.
- 3 These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

About Jaguar Land Rover

Jaguar Land Rover is the UK's largest automotive manufacturer, built around two iconic British car brands: Land Rover, the world's leading manufacturer of premium all-wheel-drive vehicles; and Jaguar, one of the world's premier luxury sports sedan and sports car marques.

At Jaguar Land Rover, we are driven by a desire to deliver class-leading vehicles, which will provide experiences our customers will love, for life. Our products are in demand around the globe. In 2018 Jaguar Land Rover sold 592,708 vehicles in 128 countries.

We support around 260,000 people through our retailer network, suppliers and local businesses. At heart we are a British company, with two major design and engineering sites, three vehicle manufacturing facilities and an engine manufacturing center in the UK. We also have plants in China, Brazil, India, Austria and Slovakia.

From 2020 all new Jaguar Land Rover vehicles will offer the option of electrification, giving our customers even more choice. We will introduce a portfolio of electrified products across our model range, embracing fully electric, plug-in hybrid and mild hybrid vehicles as well as continuing to offer the latest diesel and gasoline engines.
